# SINGIFY

David Montufo - Martí Buxeda - Víctor Jara

Introduction:

Our application is a music database, where all your favorite songs and artists appear, letting you create different playlists and getting information about them.

The API used for this project is from Discogs (https://www.discogs.com).

Design:

We have created different designs for the screens we will be implementing. To create these screens we have used the webpage Figma.

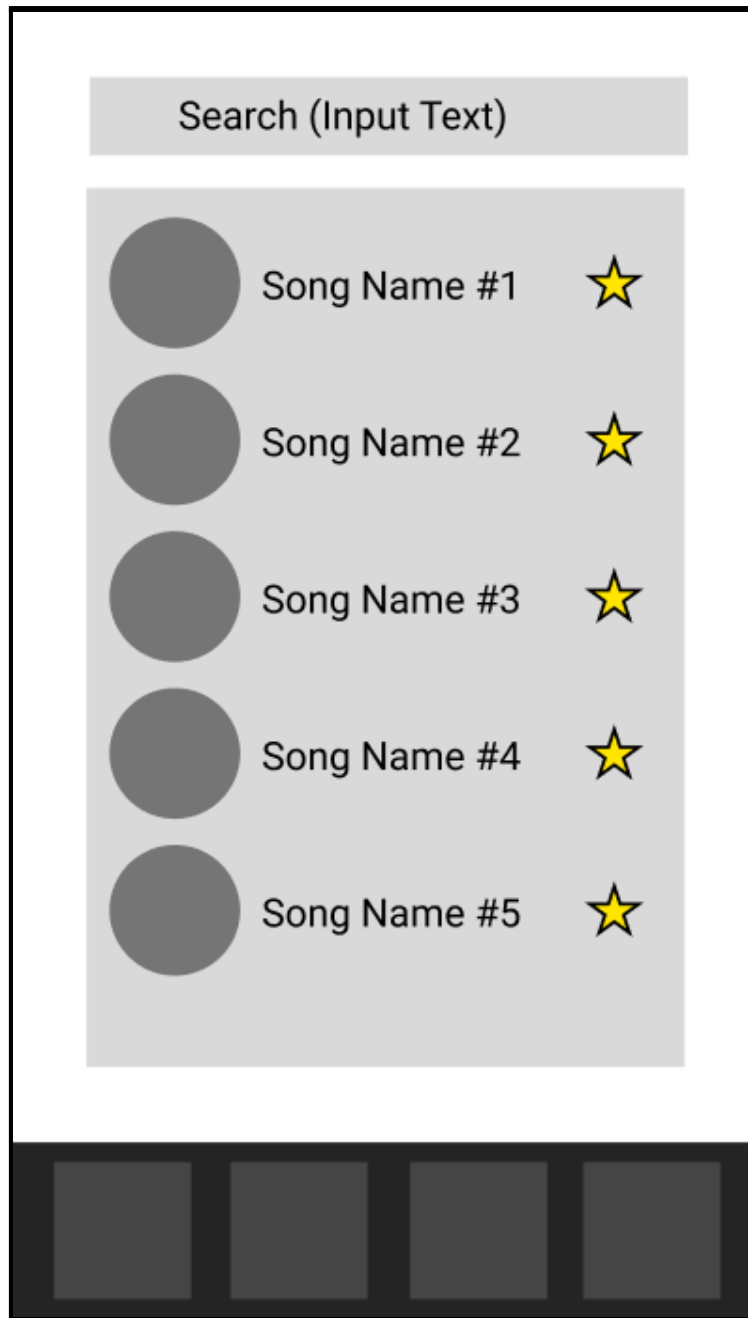

Home layout (profile)

This is the home layout. This screen will show the user's profile with his picture, name and his playlists.

Search (Input Text)

Artist Name #1

Artist Name #2

Artist Name #3
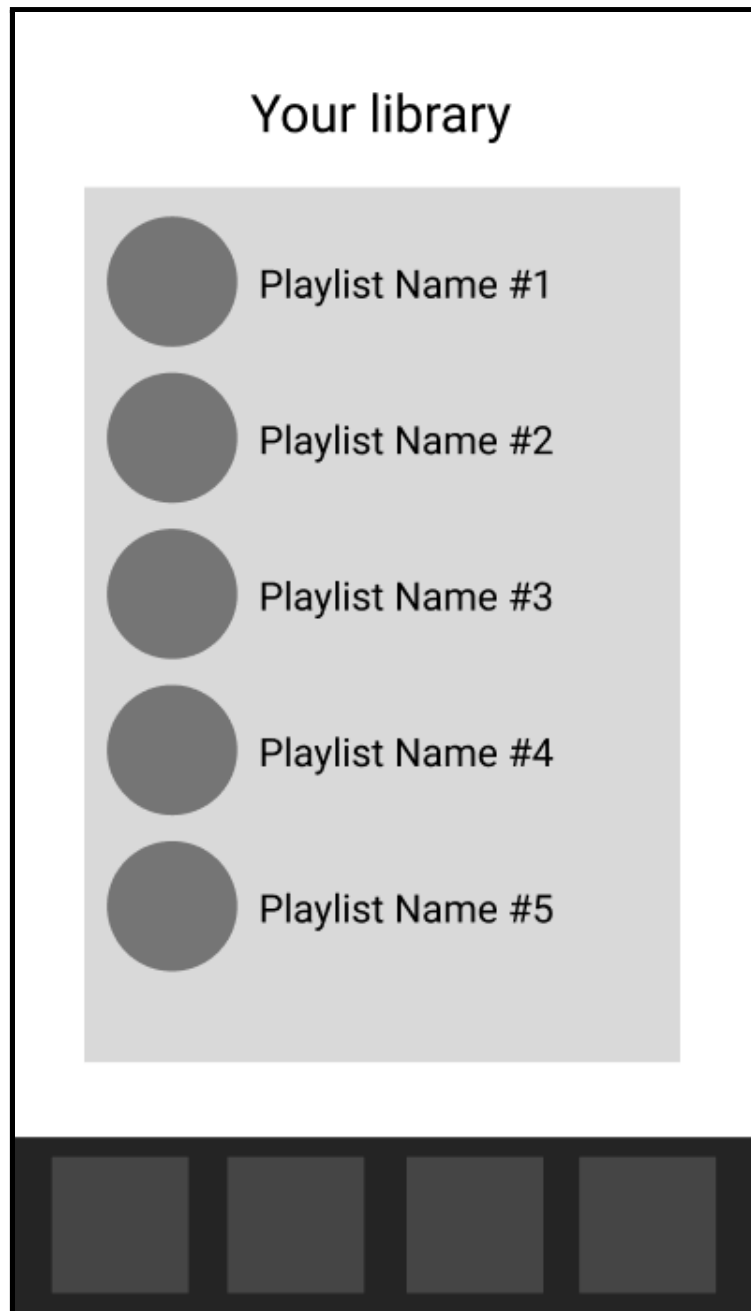

Artist Name #4
